

## Single Industry Example

The example below is drawn from the ISF from the Textiles, Clothing and outwear IRC. Skills Alignment and Uptake would be populated by the IRC in practice.

### Stage 1. Identify job families / groupings: What are the broad groupings within your industry?

*For example, Processing and manufacturing, Production, Services*

### Stage 2. Articulate the key jobs and training within each job family / grouping

Job Family (Group)	Job Function	Job Role	Skills	Associated Training	Alignment between skills and training	Uptake
<b>Textile Processing and Manufacturing</b>	Cotton Ginning	Assistant Cotton Ginner	<i>Key skills required of each job role</i>	Certificate II in Cotton Ginning	<i>Extent to which skills align with content of qualification</i>	<i>Extent to which training is used by employers as an entry and progression requirement</i>
		Cotton Ginner		Certificate III in Cotton Ginning		
		Supervisor		Certificate IV in Cotton Ginning		
<b>Textile Clothing and Footwear Production</b>	Clothing Production	Clothing Production Assistant		Certificate II in Clothing Production		
		Garment Repairer		Certificate II in Clothing Production		
<b>Other Job Families as identified...</b>						

**Stage 3. Identify qualifications in the Training Package that are not aligned to the above roles.**

Qualification	Use within industry	Uptake
